PetraNova FMS by Qserve

Every pump, tank, shift and shilling on one screen

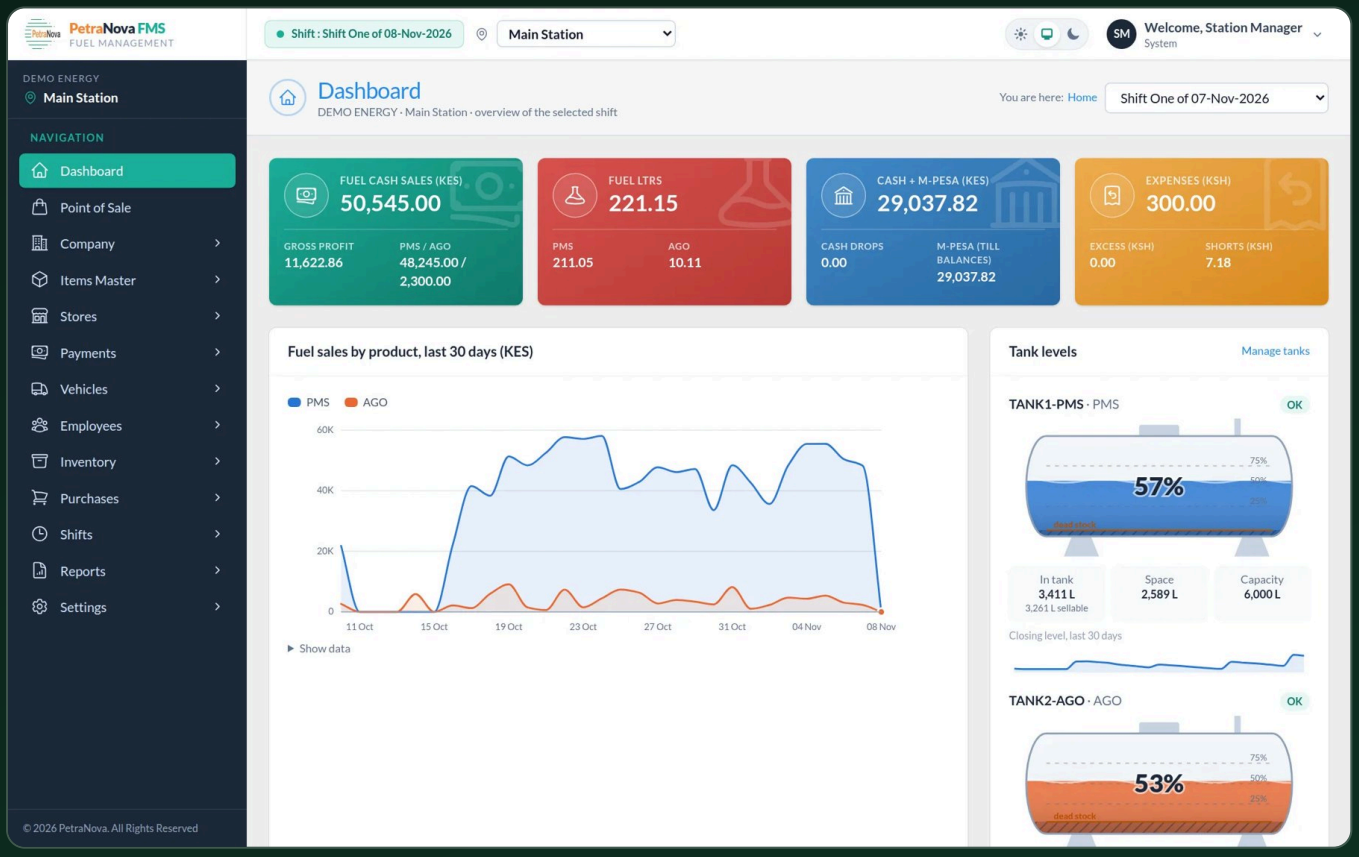

The forecourt management system for fuel stations. See what was sold, what is in the tanks and what should be in the till, for one station or many.

Web-based
Nothing to install

One or many
Stations per company

Fuel and shop
Sold in the same shift

M-Pesa ready
Seen beside cash

CORE FUNCTIONALITIES

The whole station, from delivery to banking

PetraNova FMS replaces notebooks and spreadsheets with one record that attendants, cashiers, managers and owners all work from.

What is a forecourt management system? Software that runs the daily operations of a fuel station. It records pump meter readings, fuel stock in the tanks, shifts, sales, cash and mobile money, and it reports shortages, so owners can see what was sold and what should be in the till.

Shift and pump control

- ✓ Open and close shifts
- ✓ Allocate attendants to fuel centres
- ✓ Capture manual, electronic and cash meter readings for every pump

Wet stock and tank levels

- ✓ Litres in tank, sellable stock, free space and dead stock
- ✓ Record dips and deliveries
- ✓ Track shift and monthly variance

Cash, M-Pesa and bankings

- ✓ Reconcile cash against M-Pesa paybill and till
- ✓ Record cash drops, bankings and expenses
- ✓ See shorts and excess per shift and per employee

Forecourt shop point of sale

- ✓ Sell lubricants, LPG, airtime and other shop items
- ✓ Search or scan, for walk-in or account customers
- ✓ Low-stock and out-of-stock warnings

Customers, suppliers and transport

- ✓ Customer and vendor statements, payments and debit notes
- ✓ Fuel and non-fuel purchases
- ✓ Transporters and vehicles

Reports, roles and audit

- ✓ Sales summary, stock valuation, stock variation and profit reports
- ✓ Price reviews, taxes and alerts
- ✓ Role permissions and an audit log

Built around the shift: every litre and shilling tied to a shift, a pump and a person

Open the shift

Allocate attendants to their fuel centres.

Record the sales

Meter readings for fuel, and the point of sale for the shop.

Reconcile

Cash and M-Pesa together, with drops and bankings.

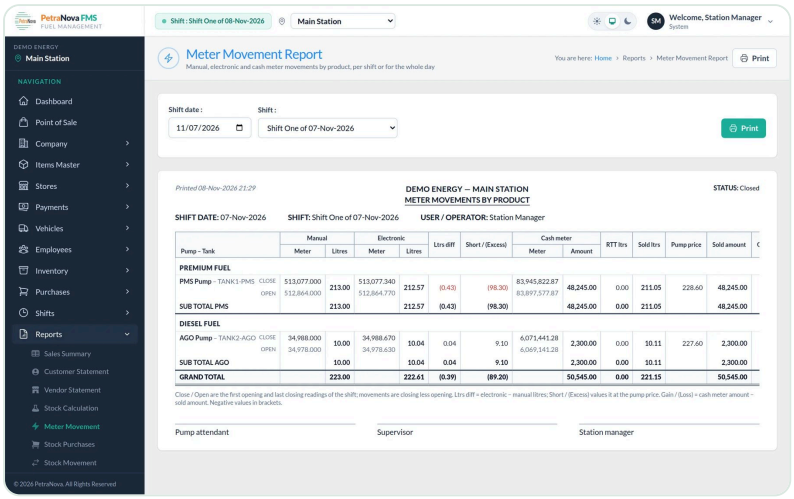

Review

Shorts, excess and tank variance while they are still recent.

SEE IT WORKING

Know where every litre went

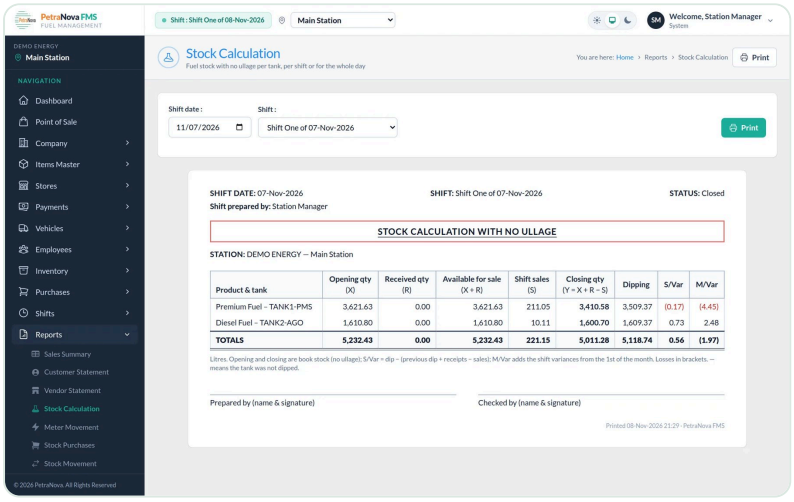

Meter, tank and shop figures are worked out for you, shift by shift.

Stop losses at the pump

The meter movement report puts manual, electronic and cash readings side by side for every pump, and values any short or excess at the pump price.

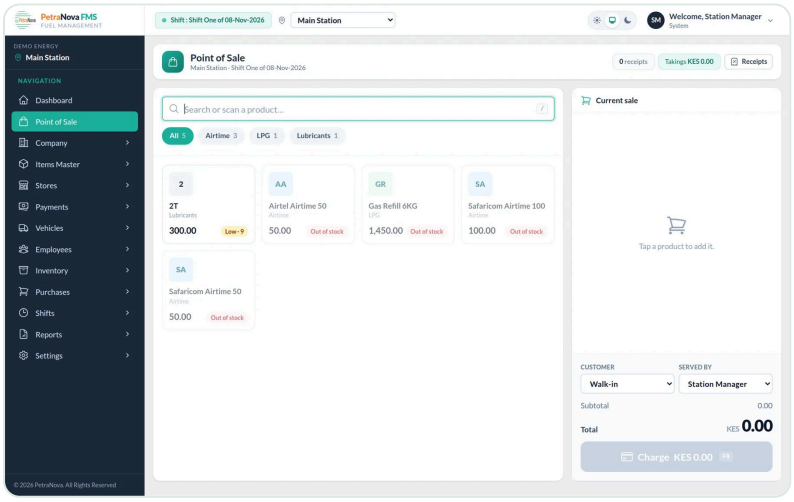

- ✓ Per-shift or whole-day view
- ✓ Shorts and excess in litres and shillings
- ✓ Printable, with signature lines

Account for fuel in the tanks

Stock calculation works out opening stock, deliveries, shift sales and closing book stock for each tank, then compares it with the dip.

- ✓ Book stock against tank dips
- ✓ Shift and month-to-date variance
- ✓ Purchases, transfers and stock take

Run the forecourt shop too

Lubricants, LPG, airtime and any other shop product sell in the same shift as the fuel, and stock levels update as you go.

- ✓ Search or scan products
- ✓ Walk-in and named customers
- ✓ Low-stock and out-of-stock flags

Business and staff names in these screens are changed for privacy.

WHY SWITCH

Better than notebooks and spreadsheets

Task	Notebooks and spreadsheets	PetraNova FMS
Closing a shift	Manual sums per pump	**Calculated from meter readings**
Fuel variance	Found at month end, if at all	**Shown per shift and month to date**
Cash and M-Pesa	Checked against separate records	**Seen together for the shift**
Staff shortages	Tracked on paper	**Recorded per employee**
Several stations	A file or book for each site	**Switch station from one login**
Who changed what	Hard to tell	**Audit log and role permissions**

Get started in four steps

1

Register
Sign up your company at fms.qserve.co.ke/register.

2

Set up stations
Add your stations, tanks, pumps, fuel and shop products.

3

Add your staff
Set what each role can access.

4

Open a shift
Start recording sales.

Common questions

Do I need to install anything?
No. It runs in a web browser, so managers and owners can open it from any device with internet access.

Can I manage several stations?
Yes. A company can add several stations and switch between them from the top of the screen.

Does it work with M-Pesa?
Yes. Add your paybill or till, and the dashboard shows cash and M-Pesa takings together for the shift.
